

HB 2 -- ECONOMIC INCENTIVES

SPONSOR: Curtis

When any proposed legislation contains language that would increase state funding or other benefit to any economic development program or incentive by more than 50%, this bill requires the legislation to contain components to encourage small business creation or capacity building, the hiring of underrepresented groups, and that 35% of the jobs be located in a specified blighted area that has seen declining population or property taxes over the preceding 20 years or contains a portion of the City of Kansas City.
